

## What is Process Facilitation?

Process facilitation is about having a clear destination and a strong route map. We keep this map simple and straightforward:

This means you can all contribute fully to the event, knowing that our neutral facilitator is managing the timings and structure.

*“Centre for Facilitation take time to really understand your objectives for a meeting, challenge you to think through the outcomes you are looking for and then offers a range of tools for the team to use to explore the issues, achieve the goals and really get involved. And it's fun!”*
